New York, NY 10003

Cost
\$450

About Vedic Astrology, or Jyotish

Vedic Medical Astrology is a branch of Vedic Astrology (Jyotish). The Ayur-Jyoti technique uses a Vedic horoscope, which is drawn by the Vedic Medical Astrologer, based on exact time, place & date of birth of the concerned person. The horoscope is a blueprint of the whole being, reflecting the complex interaction of mind, body and spirit. One's horoscope can describe with great accuracy the unique constitutional makeup of an individual, including the resilience of the immune system as well as structural and functional weaknesses.

Astrology and medicine were not, even in the West, regarded as two separate disciplines until some centuries ago. Before that, all educated persons were broadly acquainted with astrology, philosophy, and medicine. Interestingly, whereas astrology was generally considered to be a reputable occupation, medicine seldom was. Very few people know that Hippocrates, the Father of Medicine, and the one that medical doctors take an oath from, said that no one should call himself a doctor unless he or she was also an astrologer, for no diagnosis could be made without the help of astrological information on the patient.
